

Intelligent Technology Solutions' Mobility Solution

Intelligent Technology Solutions' MOBILITYSol^v enables our partners to offer the best-in-class mobile connectivity, devices, networks, and mobility management tools and services delivery systems by utilizing our manufacturers' and resellers' platforms and providing end-to-end mobility solutions and services to prosumer, consumer, and enterprise constituents that empower the customers, markets, and geographies we serve.

Intelligent Technology Solutions' objective is to increase sales for our partners by being a part of the fabric of your business plans in two key areas:

- Services – evolving our business model around providing more relevant and necessary services that help our vendor partners create a service-oriented model versus product-focused, creating sustainable revenue streams and relationships.
- Increasing Business Productivity - for ourselves, our vendors, our partners, and their customers

MOBILITYSol^v achieves this with its three pillars -- Connect, Move and Secure. On the enterprise mobility computing side, the focus is not just on the devices themselves, but also on the end-to-end device management and security of mobility. The three-pronged focus encompasses the devices themselves (connect); their connection or the networking component where data is transferred (move); and finally, securing the infrastructure and devices (control).

Intelligent Technology Solutions' Mobility E2E Solutions...the building blocks

<h3>Connect</h3> <p>Connected people, devices, networks</p>	 <p>Con/Prosumer</p>	 <p>Portable Data Terminals</p>	 <p>Rugged Computing</p>	 <p>M2M</p>	
<h3>Move</h3> <p>Intelligent Networks</p>	 <p>IP MPLS Networks</p>	 <p>3G/LTE</p>	 <p>WLAN</p>	 <p>Bluetooth</p>	 <p>RFID</p>
<h3>Control</h3> <p>Secure and Optimize</p>	 <p>Application/Device Management</p>	 <p>Mobile VPN</p>	 <p>Insight & Reporting</p>		

What is the value of Intelligent Technology Solutions' MOBILITYSol^v?

MOBILITYSol^v

- Ability to offer complete end-to-end mobility practice from device, to infrastructure, to management
- Generate a recurring revenue stream that is not only profitable but also "sticky" for our customers
- Work with the best-in-class vendors specifically chosen to not just fulfill our customers' needs, but add value to our brand
- Utilize various services and platforms offered by MOBILITYSol^v to bring velocity to your mobility business
- Utilize various webinars, events, incentives, and programs to gain an edge in your business
